

Exposures negatively associated with breast cancer risk

| Exposure                             | # of studies | Sample size | Cases   | Pooled RR (95% CI) |
|--------------------------------------|--------------|-------------|---------|--------------------|
| CAROTENOÏDEN                         |              |             |         |                    |
| Luteïne                              | 13           | 1,072,840   | 51,083  | 0.62 (0.52-0.74)   |
| Lycopeen                             | 13           | 141,249     | 13,606  | 0.68 (0.57-0.81)   |
| Bètacaroteen                         | 39           | 1,817,569   | 128,023 | 0.73 (0.66-0.8)    |
| VITAMINEN A, C, D, E EN K            |              |             |         |                    |
| Vitamine D                           | 76           | 1,316,249   | 99,950  | 0.82 (0.78-0.86)   |
| Vitamine E                           | 23           | 329,245     | 33,624  | 0.86 (0.71-1.03)   |
| Vitamine A                           | 14           | 322,062     | 20,383  | 0.9 (0.74-1.09)    |
| Vitamine C                           | 16           | 512,782     | 35,415  | 0.94 (0.82-1.06)   |
| B-VITAMINEN                          |              |             |         |                    |
| Vitamine B6                          | 7            | 92,079      | 8,361   | 0.56 (0.42-0.76)   |
| Vitamine B12                         | 9            | 88,794      | 11,404  | 0.66 (0.48-0.91)   |
| Vitamine B1                          | 2            | 38,639      | 853     | 0.75 (0.61-0.93)   |
| Foliumzuur                           | 38           | 1,079,347   | 52,296  | 0.79 (0.72-0.88)   |
| ANTIOXIDANTEN                        |              |             |         |                    |
| Antioxidanten                        | 14           | 397,778     | 21,055  | 0.65 (0.53-0.8)    |
| MINERALEN EN SPORENELEMENTEN         |              |             |         |                    |

| FYTO-OESTROGENEN                     |              |             |         |                    |
| Soja                                 | 40           | 961,262     | 34,226  | 0.75 (0.65-0.86)   |
| KRUIDEN EN BOTANISCHE PRODUCTEN      |              |             |         |                    |
| Zilverkaars                          | 3            | 31,455      | 5,515   | 0.74 (0.6-0.92)    |
| OVERIG                               |              |             |         |                    |
| Haver                                | 2            | 28,604      | 1,075   | 0.7 (0.3-1.65)     |
| Mediterraan dieet                    | 24           | 639,823     | 40,922  | 0.76 (0.7-0.83)    |
| Cafeïne                              | 11           | 872,194     | 38,461  | 0.97 (0.92-1.01)   |
| Zuivel                               | 46           | 2,055,428   | 92,012  | 0.97 (0.92-1.03)   |
| METABOLIETEN EN AMINOZUREN           |              |             |         |                    |
| Choline                              | 4            | 80,262      | 6,805   | 0.76 (0.52-1.11)   |
| Betaïne                              | 3            | 77,198      | 5,297   | 0.77 (0.56-1.07)   |
| Vertakte-ketenaminozuren (BCAAs)     |              | 224,226     | 14,045  | 0.98 (0.87-1.11)   |
| HORMONEN EN ENDOGENE STOFFEN         |              |             |         |                    |
| Melatonine                           | 10           | 62,422      | 3,175   | 0.85 (0.73-1)      |

Exposure group

- Antioxidanten
- B-vitaminen
- Carotenoïden
- Vetzuren en lipiden
- Gefermenteerde voeding en probiotica
- Fruit en groenten
- Kruiden en botanische producten
- Hormonen en endogene stoffen
- Metabolieten en aminozuren
- Mineralen en sporenelementen
- Overig
- Fyto-oestrogenen
- Polyfenolen en flavonoïden
- Vitaminen A, C, D, E en K

RR < 1 = inversely associated with breast cancer risk. | [\*] pooled RR (size proportional to # of studies) | [ ] red outline = statistically significant (95% CI excludes 1.0) | [\*] faded = non-significant | dashed line = 95% prediction interval
